Acura TL Blower Stopped Working: Fix - Josh's World

2005 Acura TL A/C not cooling? A/C stopped cooling, though the condenser fan runs as well as the blower motor and the compressor kicks on when I cycle on/off. The recirc system works and the system is charged.

2005 Acura TL A/C not cooling? | Yahoo Answers

Everything was acting perfectly fine before. But when I pulled in my driveway I put the car in neutral, pull the e-brake, shut my lights off, all like usual and shut off my car. But the blower motor is still running. So Im like what the heck! So I start the car let it run for a min, shut it off and the motor is still running.

The blower motor resistor for your Acura TL controls the speed of the blower motor using variable electrical resistance. When the control knob on the dash is adjusted to produce an increase or decrease in air flowing into the cabin, the blower motor resistor adjusts the resistance and decreases the amount of power sent to the blower motor.
