The long and short scales are two of several naming systems for integer powers of ten which use some of the same terms for different magnitudes.. For whole numbers smaller than 1,000,000,000 (10<sup>9</sup>), such as one thousand or one million, the two scales are identical. For larger numbers, starting with 10<sup>9</sup>, the two systems differ. For identical names, the long scale proceeds by powers of one ...

### The Difference Between a Long and Short Market Position

The Problem, Short-term Memory. Recurrent Neural Networks suffer from short-term memory. If a sequence is long enough, they'll have a hard time carrying information from earlier time steps to later ones. So if you are trying to process a paragraph of text to do predictions, RNN's may leave out important information from the beginning.
