Chocking the wheel will prevent the car from rolling when you jack it up. Next, remove the lug nut cover on the tire you're changing if there is one, and use a lug wrench to loosen all of the lug nuts on the tire. Now, locate the jack point underneath the car next to the wheel you're changing and position a car jack under it.

Wheel bearings are a vital part of a vehicle's suspension. Usually located in the wheel's hub, rotor, or brake drum, bearings help the wheel rotate smoothly when the vehicle moves. If you notice a humming or whirring noise while you are driving or your ABS light turns on, it may be time to change your bearings.

Ford Authority has confirmed the replacement cost for a GT500 carbon fiber wheel through a Blue Oval dealer, and unsurprisingly, it isn't cheap. A new front wheel costs a whopping \$7,015.82, while the rear wheel comes in a bit less at "only" \$5,700, though there's no indication as to why there's such a big price discrepancy between the two.
