Introduction to programming with Maple. Maple is a full-fledged programming language, but you do not need to know all the arcane features of the language to accomplish basic tasks. This section presents a few examples of Maple programs to give you some idea of what is feasible. By using the examples in this section as samples, you should be able to write your own simple Maple programs.

Math 696 -- Introduction to programming with Maple
14. Maple's Control Statements 14.1. Introduction In order to write interesting examples of procedures, we need to define two new kinds of Maple commands, the repetition statement and the conditional statement . These are called control statements since they control the order in which Maple commands are executed. So far, whenever
