When outboard motors of any size need servicing, this heavy duty engine stand offers the ideal solution. The mounting surface simulates a transom, both in angle and thickness, keeping the outboard naturally oriented while you work. The uprights are angled toward each other on either side of the engine to maximize accessibility.

After looking on-line for an outboard  
motor stand, I decided to build my own.  
After the lumber and hardware cost's,  
and the time to build it, I changed my  
mind. I bought this at Harbor Freight for  
\$48.00. It holds a 1000lb motor and is  
made very well. It was 59.99 but I had a  
20% off coupon which I got off of their  
website.
