Comparing theoretical
and experimental
probability The
following video gives
an example of
theoretical and
experimental
probability. Example:
According to
theoretical probability,

Get Free Practice Theoretical And Experimental

how many times can
we expect to land on
each color in a spinner,
if we take 16 spins?

Conduct the
experiment to get the
experimental
probability.

Theoretical Probability & Experimental Probability ...

The theoretical
probability is 8.3% and
the experimental
probability is 4%.

Get Free Practice Theoretical And Experimental

Although the experimental probability is slightly lower, this is not a significant difference. In most experiments, the theoretical probability and experimental probability will not be equal; however, they should be relatively close.

Theoretical Probability Versus Experimental

Get Free Practice Theoretical And Experimental **Probability**

o Before we start comparing experimental and theoretical probability, students will do a worksheet using a think-pair-share strategy. This will serve as guided practice. Also, the teacher will be guiding and modeling how to compare experimental and theoretical probability using the SmartBoard.
