The trapezoid has 2 pairs of base angles. Each pair share a side that is a base. Theorem 8.14 - Theorem 8.16. Theorem 8.17 - Midsegment Theorem for Trapezoids. The Midsegment of a Trapezoid is: Parallel to Each Base. Has a length equal to the sum of the length of its bases (its length is the average of the bases).

Goal. Use properties of trapezoids. Key Words.

- trapezoid
- bases, legs, and base angles of a trapezoid
- isosceles trapezoid
- midsegment of a trapezoid. A is a quadrilateral with exactly one pair of parallel sides. The parallel sides are the . The nonparallel sides are the . A trapezoid
