## **Solid Lubricant Coatings For Automotive**

Solid film lubricants are extensively used in the automotive industry. Micro Surface Corporation specializes in applying dry film lubricants for a variety of automotive applications. Our coatings are designed to support and increase

## Read PDF Solid Lubricant Coatings For Automotive Engine Pistons

the overall performance of engines and other automotive components. We offer two major dry film lubricants for industries - Tungsten Disulfide (WS<sub>2</sub>) and Molybdenum Disulfide (MoS<sub>2</sub>).

### **Automotive Solid Dry Film Lubricants Coating Solutions ...**

The current solution for this problem is

## Read PDF Solid Lubricant Coatings For Automotive Engine Pistons

to utilize Anti-friction Coatings (AFC's) on specific areas of the piston. These coatings are based on solid lubricant technology combined with that of high performance resins. The coatings are resistant to fuels and engine oils over the normal operating temperature range of the engine.
