Sound design is the emotional heartbeat of a film, TV show or game. The soundtrack has the ability to make you feel scared, to be uplifted, to bring you to tears, to build tension and release joy. At the NFTS we marry together training in the technical skills of sound design with a passion for telling stories through sound.

Television | UAL

Audio mixing for film and television is a process during the post-production stage of a moving image program by which a multitude of recorded sounds are combined. In the editing process, the source's signal level, frequency content, dynamics, and panoramic position are commonly manipulated and effects added.
