"The Logic of Life" describes what economists mean by rational and then pursues how economists use that assumption to examine crime, characteristics of cities, marriage and the family, economic growth and other issues. This may be my favorite of the three Harford books I have read. Clearly on top of recent research and is a brilliant expositor.

The Logic of Life: The Rational Economics of an Irrational ...

The Logic of Life persuades me that people's behaviour is often much more rational than is immediately apparent but that rational choices can have wholly undesirable social consequences. Tim's book is ideally suited to ambitious sixth form economists who want to experience much of the vibrancy fascination and relevance of microeconomics and enjoy the vibrancy and sense of fun which permeates ...

The Logic of Life: The Rational Economics of an Irrational ...

Life sometimes seems illogical. Individuals do strange things: take drugs, have unprotected sex, mug each other. Love seems irrational, and so does divorce. On a larger scale, life seems no fairer or easier to fathom: Why do some neighborhoods thrive and others become ghettos? Why is racism so persistent? Why is your idiot boss paid a fortune for sitting behind a mahogany altar?
