Honda Type R - Wikipedia
The Civic Type R is the ultimate embodiment of the Honda racing legacy: lightweight, aerodynamic and an absolute blast on both the track and the road. It's a testament to more than 70 years of engineering in pursuit of our dreams.

2021 Civic Type R: Racing-Inspired Hot Hatch | Honda
Civic Type R K20C1 Engine. "Not many people have seen the Civic Type R engine taken apart, let alone built into something substantial. They're pretty big engines from the factory - we're bending rods at 400 horsepower, which is unlike Hondas in the past. This engine is a totally different approach. It's a direct injection, turbo engine.

Rolls-Royce R - Wikipedia
This European Domestic Market Civic Type R featured a 200 PS (147 kW; 197 hp) 2.0-litre i-VTEC engine (K20A2) and the regular Type R treatment of seam welding, close ratio 6-speed transmission and upgraded brakes, but did not include some of the other higher-end features, such as the helical LSD and red Recaro race-seats, that were standard on the EK9.

Honda Civic Type R - Wikipedia
The 1.5 L (1,453 cc) R family was produced from 1953 through 1964, and was originally manufactured at the Toyota Honsha plant . Bore and stroke was 77 mm × 78 mm (3.03 in × 3.07 in). In common with new engines of the time, it was made from cast iron (both the block and the head), water cooled, used a three bearing crank, 12V electrics and a side-mounted gear-driven camshaft controlling overhead valves via pushrods in a non-cross flow head (exhaust and inlet manifolds being on the same side ...
