Water Transport: Origins & Early Evolution - James Hornell ...

Shipping, transporting of goods and passengers by water. Early civilizations, which arose by waterways, depended on watercraft for transport. The Egyptians were probably the first to use seagoing vessels (c. 1500 BCE); the Phoenicians, Cretans, Greeks, and Romans also all relied on waterways. In Asia, Chinese ships equipped with multiple masts and a rudder were making sea voyages by c. 200 CE ...

Timeline — Water Transportation

The history of transportation on water goes back thousands of years. Because water is the one thing that mankind needs to survive, civilizations have always been settled near and around water. Historically, societies have always located near water, due partly to the fact that water enables more efficient travel compared to going over land.

History — Water Transportation

Transport on water. Ships and boats are as old as the desire to travel over and across water, and to fish. Boats are smaller than ships. They can be powered by people, animals or engines. There are different ways of propelling ships and boats. Some are moved forward (or propelled) by rowing with oars or paddles and steered with a setting pole.

Transport on water | South African History Online

Early Boats and Horses . The first mode of transportation was created in the effort to traverse water: boats. Those who colonized Australia roughly 60,000-40,000 years ago have been credited as the first people to cross the sea, though there is some evidence that seafaring trips were carried out as far back as 900,000 years ago.

The Brief History of Transportation

The history of transport is largely one of technological innovation. Advances in technology have allowed people to travel farther, explore more territory, and expand their influence over larger and larger areas. Even in ancient times, new tools such as foot coverings, skis, and snowshoes lengthened the distances that could be traveled. As new inventions and discoveries were applied to transport ...
