Free Tripp Lite Surge Protector User Manuals ...

My dad has been bugging me with the idea that a surge protector is necessary for every appliance so that it doesn't break down. The surge protectors im talking about aren't the ones power boards come with, it's a single plug that you put into a socket. He's wrong. I dont bother and can't recall the last time an appliance has failed due to a surge.

A surge protector with 1000 to 2000 joules will provide sufficient protection, but consider the highest joule ratings—2000 and above—for home appliances. Modern surge protectors have many technical characteristics, however, power is of fundamental importance among them.

Surge Protector For a Refrigerator - RefrigeratorFAQ.com

The surge protection on most 6 socket powerboards is not very good in my opinion; often the M.O.V's do not reset or are not functional. What you should consider is a expensive single surge protector for all outlets. Computers are expensive aren't they ?
